Science and technology · Grade 1

Recognize materials

Read or look closely

A spoon may be wooden or metal. “Spoon” names the object. “Wood” and “metal” name materials.

Answers

1. What is a sheet of paper made of?

Paper.

2. A jar is made of glass. Which word names the material?

Glass.

3. A block and a pencil are both wooden. What material do they share?

Wood.

4. You want to wipe up water. Which would you use, a cloth or a sheet of glass?

Cloth.

5. Draw two objects made from the same material. Name it.

Example: a paper bag and a sheet, both made of paper.
