Science and technology · Grade 2

Observe seasonal changes

Compare observations of trees and weather across seasons.

Explore the topic with an adult if you need help.

Name _____ Date _____

Read or look closely

In fall, many deciduous trees lose their leaves. In spring, we see new buds.

Your turn

1. In which season do many leaves change colour?

2. Name one clue that spring might be returning.

3. Is one cold day enough to identify winter?

4. Draw the same leafy tree twice, once in fall and once in spring. Show how its leaves or buds change.

5. Look at the same tree each week. Write one thing you could record to see if it changes.
