Science and technology · Grade 2

# What a plant needs

## Read or look closely

To help a plant grow, we give it water and light. Individual plants have different needs.

## Answers

**1.** What do you give the plant when you water it?

The need for water.

**2.** Which place usually has more light, by a window or in a closed cupboard?

By a window.

**3.** What did it probably get too little of in the cupboard?

Light.

**4.** Draw a place for a plant that needs light.

Example: by a window.

**5.** You put one plant by a window and one in a dark corner. To compare the effect of light, name one thing to keep the same for both plants.

For example, plant type, pot or amount of water.
