Science and technology · Grade 3

Parts of a plant

Read or look closely

Roots take in water from the soil. The stem holds up the plant. Leaves receive light. Some plants have flowers.

Answers

1. Which part takes in water from the soil?

The roots.

2. Which part holds up the plant and its leaves?

The stem.

3. Which part is often flat and receives light?

The leaf.

4. Draw a flowering plant and label four parts.

Roots, stem, leaves, flower.

5. Mila draws the roots at the top of a bean plant growing in soil. Where should they go?

Below the stem, in the soil.
