Science and technology · Grade 3

Parts of a plant

Identify roots, stem, leaves and flowers.

Name _____ Date _____

Read or look closely

Roots take in water from the soil. The stem holds up the plant. Leaves receive light. Some plants have flowers.

Your turn

1. Which part takes in water from the soil?

2. Which part holds up the plant and its leaves?

3. Which part is often flat and receives light?

4. Draw a flowering plant and label four parts.

5. Mila draws the roots at the top of a bean plant growing in soil. Where should they go?
