Science and technology · Grade 3

Solid, liquid or gas

Classify water by its state.

Name _____ Date _____

Read or look closely

Ice is solid. The water in a glass is liquid. Water vapour is an invisible gas.

Your turn

1. Is an ice cube solid, liquid or gas?

2. A glass contains water you can pour. What state is it in?

3. What state is water vapour in?

4. An ice cube melts in a bowl. What change happened?

5. Draw water poured into an ice tray and what you get after freezing.
