Science and technology · Grade 4

Evaporation and condensation

Tell when liquid water becomes vapour and when it becomes liquid again.

Name _____ Date _____

Read or look closely

A puddle dries by evaporation. Drops form on a cold glass when water vapour condenses.

Your turn

1. What is it called when liquid water becomes water vapour?

2. Which word describes vapour turning into liquid?

3. A wet shirt dries on a clothesline. What change takes place?

4. Where does water outside an unbroken cold glass come from?

5. Write “liquid” and “gas.” Draw an arrow each way. Label the change next to each arrow.
