Science and technology · Grade 4

Magnets and materials

Read observations of magnetic attraction.

Name _____ Date _____

Read or look closely

Test: a steel paper clip is attracted by the magnet. A wooden stick, plastic cap and aluminium strip are not.

Your turn

1. Which object is attracted in this test?

2. Is the wood attracted in this test?

3. Which listed metal is not attracted?

4. What can you say if someone claims all metals are attracted?

5. To test another object with the same magnet, name one thing to keep the same in each test.
