Social studies · Grade 3

Corn, beans and squash

Read or look closely

Iroquoian communities grow corn, beans and squash. Bean plants can climb corn stalks. Large squash leaves cover part of the soil. All three plants provide food.

Answers

1. Name the three plants in the text.

Corn, beans and squash.

2. Which plant can the bean plant climb?

Corn.

3. What do squash leaves cover?

Part of the soil.

4. Choose two plants from the text. Draw them together. Use your drawing to show how one can help the other.

Example: A bean plant climbs a corn stalk.
