Social studies · Grade 3

# Corn, beans and squash

Identify crops and their role in food around 1500.

Name _____ Date _____

## Read or look closely

Iroquoian communities grow corn, beans and squash. Bean plants can climb corn stalks. Large squash leaves cover part of the soil. All three plants provide food.

## Your turn

1. Name the three plants in the text.

_____

2. Which plant can the bean plant climb?

_____

3. What do squash leaves cover?

_____

4. Choose two plants from the text. Draw them together. Use your drawing to show how one can help the other.
