Social studies · Grade 3

Where to build a village?

Read or look closely

Imagine two sites. Site A is near water and has soil that is easy to farm. Site B is far from water and has very rocky soil. The village needs water and a place to grow crops.

Answers

1. Which site is near water?

Site A.

2. Which site has very rocky soil?

Site B.

3. Which site would you choose? Give two reasons from the text.

A: Water is nearby and the soil is easy to farm.

4. Draw the site you chose. Label where the water and crops would be.

Water is close to the village and crops grow on suitable soil.
